

Legacy Walkway and Quinlivan Circle Notre Dame College South Euclid, Ohio

URS assisted Notre Dame College in the planning, design and implementation of a master plan to help provide for a planned growth of the campus that would aid in the strategic direction of the college.

Key to the design of the master plan was the creation of a central circle and plaza, giving students a gathering space and a network of pathways linking current and future buildings. URS designed and created contract documents to complete Quinlivan Circle, Legacy Walkway Plaza, parking and circulation improvements, and landscaping for the college in 2005.

Design of this plaza and walks included an intricate brick and concrete pattern. This pattern allows the college to continually offer donor bricks to be installed upon the walk. Additionally, the design of the walk incorporated many large existing trees.
